ACADEMIC APPOINTMENT

2011-Present Associate Professor of Psychology
Old Dominion University, Norfolk, VA

2005-2011 Assistant Professor of Psychology
Old Dominion University, Norfolk, VA

EDUCATION & TRAINING

Post-Doctoral Fellow Department of Psychology
2003-2005 Syracuse University, Center for Health and Behavior

Doctor of Philosophy University of California, Los Angeles
2004 *Major:* Quantitative Psychology
Minor: Health Psychology
Dissertation: Latent Variable Mixture Modeling as Applied to
Survivors of Breast Cancer

Master of Arts University of California, Los Angeles
1999 *Major:* Quantitative Psychology
Master's Thesis: Detecting Invariance Between the Paper-and-Pencil
and Computerized Versions of the NEO PI-R using Multivariate
Analysis of Variance and Differential Item Functioning

RESEARCH INTERESTS

- Personality antecedents of adolescent and young adult risky health behaviors (e.g., substance use and risky sex)
- Moderators and mediators of substance use intervention efficacy
- Ecological momentary interventions for college drinkers

- Predictive validity and intra-person variability of drinking motives in college drinkers
- Applications of Item Response Theory (IRT) to substance use behaviors
- The application of mixture detection to latent variable models

TEACHING: STUDENT FEEDBACK

GRADUATE:

“Dr. Henson is definitely the best professor I have ever seen at presenting high level statistics in an understandable manner. I have never seen anyone with his level of knowledge. He is an important asset to ODU. The classroom environment was very comfortable and laid back. Lots of laughter. This helps with such an involved subject.”

“The professor is very attuned and responsive to students' needs. He is truly an expert in this subject. It was great to have someone with a sense of humor to keep the tone light and keep interest up. Dr. Henson's enthusiasm about the subject is contagious and inspiring. His abilities for teaching seem quite natural. It was always clear that he cared about student well-being and learning. He was available at all hours to answer questions by email and would meet as students needed it.”

“Dr. Henson uses the board EVERY class to show us how the concepts actually work. In fact, one of the most refreshing, and inspiring things Dr. Henson does is when he knows that we do not understand a concept he is teaching, he won't let us progress until he is sure that we have mastered

the concept, and all questions have been answered. He makes us feel very encouraged and supported in the process of trying to learn such difficult concepts.”

“Dr Henson's presentations were the most informative I have ever attended.”

UNDERGRADUATE:

“Hands down, one of the best instructors I've ever had. He always made time to help, made the lectures fun, and his lectures also helped me outside the course with other classes I was taking.”

“Dr. Henson is truly an excellent instructor. I was apprehensive about taking the course to begin with. Dr. Henson explained why Psychology majors needed to know and understand statistics. He used very applicable examples that were both informative and entertaining. I feel that he challenged his students to think critically by understanding the ‘why’ rather than just memorizing the processes.”

“Dr. Henson is by far the best instructor that I have ever taken! I have to say that I was very apprehensive about taking this class, but I was very impressed by him. He is very fair, approachable, and willing to help you, so long as you are willing to help yourself. I have a lot of respect for him.”

“Dr. Henson was an amazing professor. He has an amazing way of teaching. This is an extremely tough class, yet he can still manage to make us laugh every once and awhile, which is so nice when we have to be so serious about this course.”

“I think the instructor is a big part of class. An instructor can make the class fun and interesting, even when material is no. That is exactly what he did. I strongly recommend him to anyone for this class.”
